CDK Engineering Services Ltd  
SEALING SOLUTIONS FOR INDUSTRY

CDK Engineering Services Ltd  
Sealing Solutions and Fluid handling

## Food and Beverage

Utilising knowledge gained from 20 years in the cosmetic and food industries CDK works closely with several manufacturers to offer complete turnkey solutions to today's busy engineering departments. Specialising in sealing solutions and fluid handling CDK can quickly source spares for production machines, processing plants and packaging machines. From Spirax Sarco steam valves to specially manufactured items. Industries covered are the Dairy, Brewing, Salad, Soft drink, Meat processing, Ready meals, Confectionary, Ice cream, Soups, Sauces, Pickles, Frozen Dessert and much more.

Supplying Glyd rings, PTFE seals, Silicon Gaskets, O rings, Variseals and bearing strips to name a few. From a basic O ring to specially manufactured items we are your co-partner for a successful relationship.

Suppliers to the Food & Beverage, Cosmetic, hydraulic & pneumatic, packaging and aerospace industries. Sourcing seals and spares for Ampack's, Regal's, Dawson's, Mondomix, Tanis whipper, Colunio's and Hassia packaging machinery.

Specialising in being a single source supplier who can offer all your requirements as a complete package, delivered on time to the highest quality whilst maintaining very competitive prices.

Offering free technical advice and assistance with design together with the support that one would expect from an international company. All we ask is for some of your time in order for you to see the benefits of having CDK engineering Services Ltd as a supplier

### Fields of application

- Appliances
- Boilers
- Connections(Quick Disconnect)
- Cutting technology (saws)
- Drink Dispensing
- Dryers
- Evaporators
- Filling technology (liquid media, pasty media)
- Filtering technology
- Freezers
- Homogenizers
- Mixing technology(mixers, blenders, agitators)
- Ovens
- Packaging technology
- Pipe systems
- Plate heat exchangers
- Processing equipment
- Pumps
- Tanks
- Valves
- Washing/Sanitizing equipment

CDK Engineering Services Ltd  
Sealing Solutions and Fluid handling

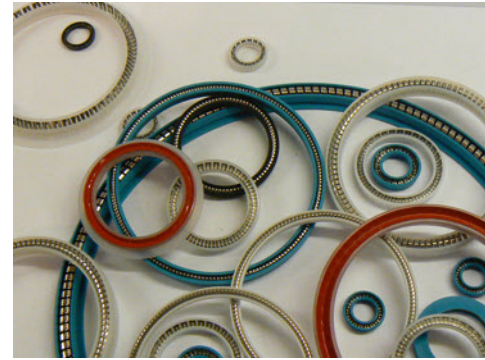

## Food and Beverage

Sealing and bearing solutions must cope with extremes of aggressive media, temperatures, pressure, and motion in working operations, and the rigor's of clean-in-place (CIP) and sterilize-in-place (SIP) processes involving aggressive chemicals and steam. Performance expectations are ever-increasing and the equipment designer and plant engineer must be confident that critical components will provide unfailing performance. We proudly offer a broad line of elastomer and thermoplastic products providing exceptional chemical and thermal resistance. Our product offering is extensive and we have more than 2,000 material compounds available to produce seals, bearings, and custom shapes for static, dynamic, reciprocating, oscillating, and rotary applications.

CDK works closely with our customers to find the seal and bearing materials and designs that will maximize the performance of their equipment.

Working together benefits the customer with increased service life and extended mean time between planned maintenance. This means reduced downtime, better production efficiency, higher yields, and improved process reliability, all minimizing total cost of ownership.

CDK is proud to provide sealing solutions to original equipment manufacturers and processors in the food and beverage industries.
